## **TibiaME – Magic Spring Update for Mobile MMORPG released**

Regensburg, May 14, 2009 – CipSoft announced the release of its spring update for TibiaME, the first MMORPG for mobile phones worldwide.

The biggest change in this update has been made to the magic system of TibiaME. Although magic has already been a big part of the medieval fantasy world, a completely new spell system has been introduced. From now on, magicians can use their magic potential to their full extent by casting numerous powerful spells like "meltdown" or "souleater".

"A fully elaborated and sophisticated spell system has been on our list for quite some time now" says Benjamin Zuckerer, Product Manager for TibiaME at CipSoft. "However, the introduction of such a feature has a major influence on the game balance and must be considered very carefully" Zuckerer explains. "However, already the first tests during the BETA have shown that battles got much more challenging and therefore way more interesting for our players"

In addition to the spell system new content like the jungle island has been added to the map of TibiaME.

The last year has been exceptionally successful for TibiaME. With a growth of over 100% in its subscriber base, TibiaME is the fastest growing product within CipSoft's portfolio. Especially the Indonesian market is performing very well due to a new distribution strategy.

TibiaME is the first MMORPG for mobile phones worldwide. In the colourful real-time fantasy world of TibiaME, hundreds of players can set forth together in search of adventure. Playing as warriors or wizards, they are faced with the challenge of developing their skills, exploring a large variety of areas, unravelling secrets and interacting with each other on social and martial levels. Currently, more than 30,000 players enjoy TibiaME every day.
